

Regulatory Governance Foundations

Built for Regulators by Regulators.

**ONLINE
COURSE**

Strong, stable governance is the foundation of effective regulation. Yet board members often step into their roles with varying levels of experience and understanding of their responsibilities. **Regulatory Governance Foundations** is a self-paced online course designed specifically for Canadian regulatory board members and the staff that support them. Through a blend of multi-media materials covering 8-12 hours of content, participants gain the essential knowledge and tools to start governing with confidence in the public interest.

To ensure the online learning connects back to each board's own specific governance challenges, we have also incorporated a 3-hour **facilitated debrief session**. This real-time virtual engagement with our senior governance practitioners brings everyone together to reinforce the individual learning, answer burning questions, and apply the materials to each board's specific context, making the learning both practical and contextual. The sessions can be tailored to each board's needs - some prefer a single 3-hour session, while others opt for shorter check-ins throughout the journey.

Why Online Learning?

- + **Impactful:** Knowledgeable board members support good governance, which in turn supports effective regulation
- + **Accessible:** Flexible and asynchronous - board members can start and learn at their own pace, on their own time, year-round
- + **Contextual:** Built for the unique context in which regulatory boards operate
- + **Shared Foundation:** Every board member receives the same core governance onboarding, no matter when they join
- + **Interactive:** Engaging videos, live debriefs, and reflection exercises make the learning active and easy to retain
- + **Ongoing Practice:** Tools, resources, and a digital workbook support continued development and learning

Course Features

Videos

Dynamic lessons that bring concepts to life

Audio Interviews

Insights from regulatory and governance practitioners with real-world experience

Interactive Activities

Reflect on and apply learning in real time

Digital Workbook

Reference guide with core concepts, exercises & key takeaways

Curated Resources

Hand-picked materials for deeper learning

Live Debrief Session(s)

Connect personal learning to board practice in a facilitated group setting

Course Modules

1 The Mandate

Understand the unique role of regulatory boards, their public interest mandate, and the principles that set regulatory governance apart.

2 Governance Inputs

Explore the governance structures and practices that provide the foundation for regulatory governance, and the various reforms and trends impacting the regulatory landscape in Canada today.

3 Governance Input Assessment

Explore seven indicators that can help you assess if your governance structures and practices are fit for purpose and supporting the regulatory mandate.

4 Public Interest Decision-Making

Understand the foundation of making good public interest decisions: the legal duty of board members, ways to effectively manage conflicts of interest, and how to ensure a reasonable and transparent decision-making process.

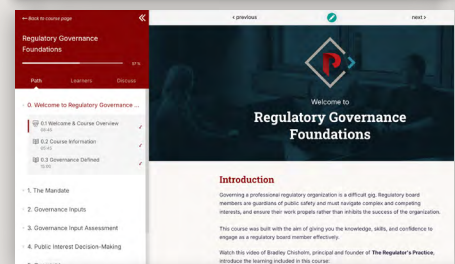

5 Oversight

Examine the key oversight responsibilities of regulatory boards, tools to support the oversight work, and the value of a strategic perspective.
